Supplement for 1910
Horsford's Autumn

HARDY PLANTS

FOR COLD WEATHER

Fred'k H. Horsford
Charlotte, Vermont, U. S. A.

Lilium Henryi

INTRODUCTION

THIS SUPPLEMENT is designed to go with my Spring Catalogue, and it should not be understood that it contains all the kinds suitable for fall setting. Most of the plants of the spring list are also set in autumn. Autumn planting, with many, is more popular than spring. When spring planting is left until plants have made considerable growth, if followed by much hot sunshine, the plants are less likely to succeed than when set in autumn. This is especially true with woody plants. On the other hand late fall planting must be followed with a good protection, else your plants are ruined the first winter.

When dry hot weather follows the setting of many herbaceous perennials, they may be shaded from the sun for a few days and until the rootlets can get a hold and will do much better for this.

Woody plants, shrubs, trees, etc., should not be set until all growth for the season has ceased. This dormant period comes much earlier some years than others. Usually we can begin to ship some of the

shrubs by the middle of October in Vermont. Farther south it is much later before it is safe to lift them.

It is important to cover well those set in autumn and the later the setting the more important the covering. Early set tulips and other fall bulbs may not require much covering, but those set late should have it, and almost all herbaceous perennials set in the fall best be well protected against the warmer spells of weather which come in winter. It is the warmer spells followed by extreme cold ones which do the damage. If, when hardy plants are once frozen in for the winter, they could stay so until severe frosts are past in the spring, they would seldom be injured. This covering should not be removed until danger of severe frosts is past.

Kindly remember that those who purchase plants should return them within five days if not satisfactory. After five days I will not replace them. See fourth paragraph page 2 of Spring Catalogue.

Those who wish to call me by telephone during shipping season please do so at 12:30 and 6:30 p. m.

LILIES

Most of the Lilies of this list may be sent in September, but a few, like *Auratum* and all the *Speciosums*, *Sulphureum*, and *Henryi*, are not ripe until last of September or October. Orders will be filled from beds as long as my stock lasts.

Too much cannot be said in favor of planting *Lilium candidum* early. The autumn growth which it makes before winter is quite essential, both for resisting severe winters and for next year's blooms. If you can't plant it before October wait another year, or plant in spring.

Candidum lilies best not be planted more than 3 to 4 inches under, but in this northern climate we find it best to cover with some straw or swale hay just before winter, and this should be removed in spring.

For cultural directions and more definite description please see Spring Catalogue, which has been mailed.

These prices do not include postage, but simply bulbs boxed and delivered to my nearest freight or express office.

See spring list for delivery by mail.

	Each	Doz.
<i>Lilium auratum</i>	\$0 25	\$2 25
<i>L. auratum rubro-vittatum</i>	55

<i>L. Wallichianum superbum</i> . See <i>L. sulphureum</i> .		

DAFFODILS, or NARCISSI

Early-flowering bulbous plants, coming before the tulips and after the crocus. One of the most important groups; fine for cutting and of easy culture. Though any good garden soil suits, they prefer a rather stiff, deep soil, and if the situation is such that they are shaded from the sun a portion (a third or a half) of the time, so much the better. They do well among shrubbery. To get the best results,

they should be set in August or September, so as to make a good root growth before winter. When late setting is done, the best results are postponed until the second season.

Many of the bulbs we plant in the fall, such as tulips, hyacinths, narcissi, etc., make a root-growth underground after being set. If we dig up such bulbs a week or two after they have been set, we are surprised at the new root-growth which has formed at the base of the bulbs. This root-growth is often made quite late and at low temperature. Therefore when such bulbs are planted quite late in the fall it is well to place a thick covering of straw manure, leaves, or some sort of covering over them to keep out frost as long as possible, so that this root-growth may continue even after the surface of the ground is frozen. I have seen fairly good results obtained in this way with late planting. The covering should come off with the early spring before the bulbs are up.

If by mail add 6 cts. per doz. for those without stars (*), and
10 cts. per doz. for those marked with a star.

	Each	Doz.
* Narcissus bicolor Empress. Very large flowers; white perianth, rich yellow trumpet; strong grower and fine for cutting. Per 100, \$3.00.....	\$0 06	\$0 40
* N. bicolor Horsfieldii. Very large and early; yellow trumpet and white perianth.....	06	40

N. Jonquilla. Single yellow Jonquils; yellow fragrant flower.....per 100, \$.90		25
N. incomparabilis, Double. (Butter and Eggs) A large and showy double variety. One of the largest of the double sorts...per 100, \$2	05	35
*Mixed Daffodils, to naturalize in meadows, etc. A first-class mixture, comprising many of the best herein listed.....per 100, \$1	05	30

CROCUSES

The ordinary spring-flowering Crocus will thrive in nearly all soils and positions.

Add 5 cts. per doz. if to be sent by mail.

	Doz.	100
Mixed Crocuses.....	\$0 10	\$0 40
“ “ Striped	10	45
“ “ White	10	60
“ “ Yellow	20	1 00
“ “ Blue and Purple	10	45

TULIPS IN MIXED COLORS

Tulips like good drainage, and when planted over a gravelly subsoil or bottom succeed best. It is a good plan to surround bulbs with sand, unless they are put into a sandy soil. A depth of 4 inches is none too deep for cold climates. Set the bulbs 5 or 6 inches apart.

In ordering Tulips by post, add 6 cents per dozen for postage.

	Doz.	100
Large Early Single.....	\$0 20	\$1 00
“ Late “	25	1 00
“ Early Double.....	20	1 00

Queen Victoria. Large, white.....	30	2 10
Pax Alba.....	30	2 10

ERYTHRONIUMS

(Dog's-Tooth Violets)

Early-blooming bulbous plants, which must be set in autumn. They come up among the first flowers of spring and are very interesting, both in flower and leaf.

Add 3 cents per dozen for postage if by mail.

Erythronium albidum. A charming white flowered species
8 cts. each, 80 cts. per doz.

Erythronium Americanum, (Common Adder-Tongue). Handsome, bright yellow flowers; hardy, 8 cts. each, 65 cts. per doz.

HYACINTHS FOR BEDS

Hyacinths like a light, loamy soil and full sun. A light coating of well-composted manure, if the ground is not already well supplied, will be of value. Plant about 3 inches deep and if the best flowers are desired the bulbs should be from 7 to 9 inches apart.

Add 16 cents per dozen for postage if by mail.

	Each	Doz.
Double Mixed.....	\$0 10	\$0 80
Double White and Blush.....	10	85
Single Mixed.....	09	70
Single Red and Rose.....	10	80
Single White.....	12	90
Single Yellow.....	12	90

TRILLIUMS

American Wood Lily, Indian Shamrock, or Three-Leaved Nightshade

For the Shady Corner.

Like most early-blooming plants, Trilliums give better results the following spring when planted in autumn in time to make their regular root-growth, which seems to take place a few weeks after the stems have died. They form a very pretty group, which comes into bloom early, and whose leaves make a good display after the flower has passed. Trilliums like a soil with a mixture of leaf-mold or peat, and for most of them a little well-rotted manure will be beneficial. Although they may, as a rule, be grown in the sun, partial shade is the most natural place. They look best when in good-sized groups. In a good position they will last almost indefinitely.

Add 10 cents per dozen if by mail.

	Each	Doz.
Trillium erectum. Purple.....	\$0 10	\$1 00
T. " albidum. White.....	10	
T. grandiflorum. White.....per 100, \$2.50	05	40
T. erythrocarpum (Painted Trillium).....	10	1 00
T. sessile giganteum.....	25	

BULBOUS IRIS

For fuller list of Iris see my Spring Catalogue.

	Each	Doz.
Iris Susiana (Mourning Widow). A large, striking species from Asia Minor. One of the best for culture.....	\$0 20	\$2 00
I. xiphium (Spanish Iris). Very fine bulbous flowering plants, coming into bloom soon after the German Iris, with blue, white and yellow flowers.....	05	25
I. xiphoides (English Iris). Large flowers in handsome blue and white colors, about as tall as the Spanish Iris and coming just after	06	35

Miscellaneous Bulbs and Plants

Which, because they bloom early, or for other reasons, are set in autumn.

See my Spring Catalogue for cost of postage if sent by mail.

	Each	Doz.

Bargain List

These sets are made up mostly of plants mentioned in my spring catalogue of kinds of which I have the largest stock. We have more time to make these sets in autumn and offer them at lower rates on this account.

These offers are not open to spring delivery, because then we cannot spare the time they require in filling. Those wishing to take advantage of any offers for shrubs, trees, etc., in this list, for spring setting, can get them in November, and cover them in any well drained soil, leaving only the tips of the branches exposed, where they will keep in perfect condition, and may be set in spring as soon as the ground is ready. For cost of boxing trees and shrubs, see my Spring Catalogue. These prices do not include postage.

Parties wishing these sets by mail will be given cost of postage upon application, where mailing is possible. We can ship safely by freight in autumn most of the plants we grow, even as far as California. These offers are subject to surplus stock being sold. This stock is not a poorer grade than is used in filling orders for single or dozen lots. Deciduous trees and shrubs had better not be moved before October. Bulbs and plants which are entirely covered when set can be ordered until winter prevents.

Shrubs, trees and plants set in autumn, and mulched well before winter to prevent heaving, often do better than when set in spring, especially when spring setting is late. Trees may be banked up 6 to 10 inches with soil, shrubs mulched with 2 to 3 inches of straw manure, and herbaceous plants covered lightly with brush, pine boughs, buckwheat straw or any similar substance that will protect without smothering.

This protection for winter is very important for all plants, shrubs and trees set in the fall in our northern climate the first year. After they have become established the shrubs and trees and most of the herbaceous plants need not be covered.

Please do not ask us to divide these offers nor to fill orders from this list after December first.
